Electronic Trainers

Model: ES74870
Name: Understanding and Experimentation with Digital ICs

Model: ES74792
Name: Operational Amplifier Lab

Model: ES74797
Name: Understanding Characteristics of MOSFET, FET and UJT

Model: ES74798
Name: Understanding Characteristics of DIAC, TRIAC & SCR

Model: ES74806
Name: PPM Modulation and Demodulation Trainer

Model: ES74881
Name: PWM Modulation and Demodulation Trainer

Model: ES74886
Name: PAM Modulation and Demodulation Trainer

Model: ES74661
Name: Experimentation with Diodes

Model: ES74892
Name: Experimentation with Transistor Characteristics

Model: ES74662
Name: Experimentation With Rectifiers

Model: ES74664
Name: Experimentation with Active Filters

Model: ES74663
Name: Experimentation with Hartley and Colpitt Oscillator

Model: ES74898
Name: Experimentation with Astable and Mono-stable Multi-vibrator

Model: ES74899
Name: Experimentation with Zener Diode Voltage Regulator

Model: ES74890
Name: Clipper and Clamper Trainer

Model: ES74661
Name: Experimentation with Kirchhoff`s Current and Voltage Law

Model: ES74892
Name: Experimentation with Transient Analysis of RC/RL Circuits

Model: ES74662
Name: Experimentation with Transient Analysis of RLC Circuit

Model: ES74664
Name: Two Port Network Trainer

Model: ES74663
Name: Experimentation with Two Port Ladder Network

Model: ES74898
Name: T and $_{TT}$ Network Trainer

Model: ES74899
Name: Interconnection of Two Port Networks

Model: ES74890
Name: Power and Differential Amplifier

Model: ES74661
Name: Experimentation with Maxwell`s Bridge

Model: ES74892
Name: Experimentation with Kelvin`s Bridge

Model: ES74662
Name: Experimentation with Hay`s Bridge

Model: ES74664
Name: Experimentation with BJT Amplifiers and Emitter Follower

Model: ES74663
Name: Lissajous Pattern Trainer

Model: ES74898
Name: Experimentation with Logic Gates

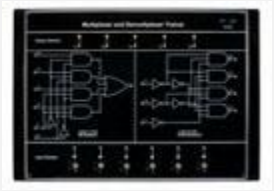
Model: ES74899
Name: Experimentation with Characteristics of TTL and CMOS

Model: ES74890
Name: Experimentation with Universal Gates-Nand and Nor

Model: ES74861
Name: Experimentation with De-Morgan`s Theorem

Model: ES74870
Name: Experimentation with Adders and Sub-tractors

Model: ES74792
Name: Flip-Flop Demonstrator



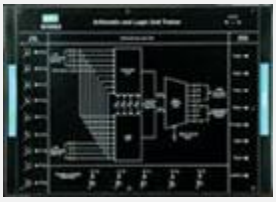
Model: ES74797
Name: Multiplexer and De-multiplexer Trainer

Model: ES74798
Name: Encoder and Decoder Trainer

Model: ES74806
Name: Counters Trainer

Model: ES74881
Name: Shift Registers Trainer

Model: ES74886
Name: BCD Adder and Sub-tractor Trainer



Model: ES74661
Name: Arithmetic and Logic Unit Trainer

Model: ES74892
Name: Parallel Adder and Sub-tractor Trainer

Model: ES74662
Name: SOP & POS Implementation Trainer

Model: ES74664
Name: Understanding Wien Bridge

Model: ES74663
Name: Experimentation with FET Amplifier
